## **EXECUTIVE SUMMARY**

During June and July 2010, HzW Environmental Consultants, LLC (HzW) conducted an Environmental Site Assessment Screening (ESAS) of the Seven Hills Sewer Line Project Area, which is situated between Broadview Road and Laura Lee Lane in Seven Hills, Cuyahoga County, Ohio (herein referred to as the "Project Area"). This report was prepared in accordance with the Ohio Department of Transportation's (ODOT's) Environmental Site Assessment Guidelines dated April 2009 for Environmental Site Assessment Screenings. This ESAS was authorized by Mr. Richard Iafelice, representative of CT Consultants, Inc. (the Client). The primary purpose of this assessment was to identify properties or conditions that pose a potential environmental concern to the Project Area.

The Project Area includes several residential properties and public thoroughfares situated between Broadview Road and Laura Lee Lane. The public thoroughfares included in this ESAS consist of Twilight Drive, Nemet Drive, Cherry Lane, Hillside Road, Seven Hills Boulevard, Shady Lane, North Mary Lane, Mary Lane, South Mary Lane and Oak Lane. Each of the public thoroughfares mentioned above will undergo construction activities consisting of the installation of new sanitary sewers.

Elements of this ESAS included conducting a physical site inspection of the Project Area, a visual inspection of the adjacent areas from the approximate Project Area, and conducting a review of various mapping resources (aerial photographs, topographic map, bedrock geologic map, physiographic map, glacial and surficial geology map, principal streams map, groundwater resources map, soil survey and oil/gas well map) to evaluate the Project Area. In addition, HzW conducted a review of local, state and federal environmental databases to identify any properties located within the Project Area or a one-quarter (0.25) mile radius of the Project Area that may be included on these databases.

All of the properties included in this ESAS are residential properties. HzW determined the permanent parcel numbers (PPNs) comprising each property included in this ESAS based on Client-provided mapping. Based on the findings of this ESAS, none of properties located within the Project Area are recommended for inclusion in Phase I ESA activities.

## 1.0 INTRODUCTION

### 1.1 Proposed Transportation Project

The Project Area includes several residential properties and public thoroughfares situated between Broadview Road and Laura Lee Lane. The public thoroughfares included in this ESAS consist of Twilight Drive, Nemet Drive, Cherry Lane, Hillside Road, Seven Hills Boulevard, Shady Lane, North Mary Lane, Mary Lane, South Mary Lane and Oak Lane. Each of the public thoroughfares mentioned above will undergo construction activities consisting of the installation of new sanitary sewers. A client-provided map depicting the construction areas is included as **Appendix A**.

All of the properties included in this ESAS are residential properties. HzW determined the permanent parcel numbers (PPNs) comprising each property included in this ESAS based on Client-provided mapping. A complete listing of each parcel comprising the Project Area and adjacent properties, including the parcel number, owner and address has been included as **Appendix B**. According to the Zoning and Thoroughfare Map provided by the City of Seven Hills Engineering Department, all of the properties in the Project Area are zoned residential. A property map depicting the proposed Project Area is presented as **Figure 1** and the Zoning and Thoroughfare Map is presented in **Appendix C**.

### 1.2 Physical Setting

Various mapping resources were reviewed to evaluate the general physical setting of the proposed Project Area. A brief description of the physical setting of the proposed Project Area is presented below.

#### *TOPOGRAPHY*

According to the 1994 Cleveland South and 1963 (photorevised 1984) Broadview Heights, Ohio quadrangle USGS topographic maps, the topography of the Project Area gradually slopes from the southwestern portion with an elevation of 1,140 feet above NGVD, to approximately 1,000 feet above NGVD in the northeastern portion; an intermittent stream is depicted in the eastern portion. A copy of the USGS topographic map representing the Project Area is included as **Appendix D**.

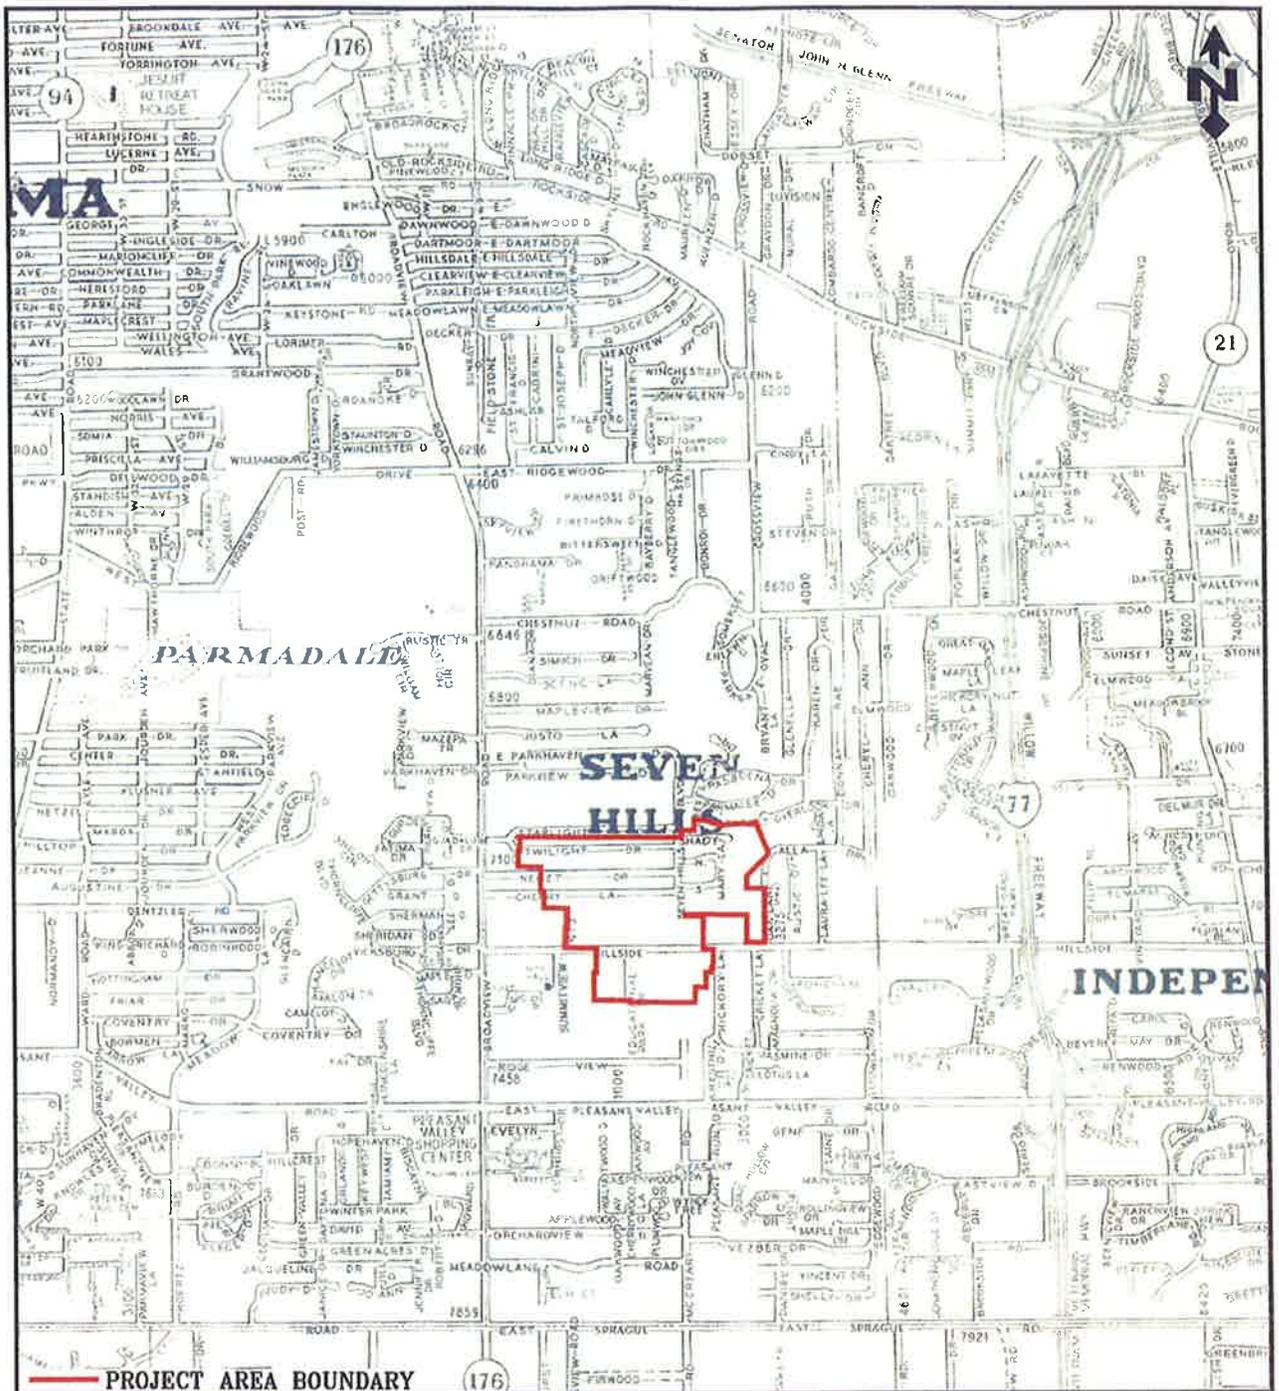

#### *GEOLOGY*

According to the *Geologic Map of Ohio*, published by the Ohio Department of Natural Resources (ODNR), bedrock beneath the Project Area consists of Upper and Lower Mississippian shale, siltstone, sandstone, conglomerate, and limestone of the Logan and Cuyahoga Formations. Bedrock is not exposed at the ground surface of the Project Area. A copy of the Geologic Map of Ohio is included as **Appendix E**.

#### *BEDROCK TOPOGRAPHY*

According to the Bedrock Topography Map of the Revised 1996 Cleveland South and Revised 2002 Broadview Heights, Ohio Quadrangles, published by the ODNR, bedrock beneath the western, southwestern and central portions of the Project Area is located at approximately 1,100 feet above NGVD, while the bedrock beneath the northeastern portion of the Project Area is located between 1,050 and 1,000 feet above NGVD. Bedrock topography in the vicinity of the

**HzW ENVIRONMENTAL CONSULTANTS, LLC**

6105 Heisley Rd. • Mentor, OH 44080  
 440-357-1260 • Fax 440-357-1510

**FIGURE 1**  
 SITE LOCATION MAP  
 SEVEN HILLS SEWER LINE  
 SEVEN HILLS, CUYAHOGA COUNTY, OHIO

Property slopes slightly to the northeast. A copy of the Bedrock Topography Map is included as **Appendix F**.

#### *HYDROLOGY*

According to the *Principal Streams and Their Drainage Areas Map*, published by the ODNR, the Project Area is located within the 809 square mile drainage basin of the Cuyahoga River. Topography indicates local surface water runoff from the southern portion of the Project Area is anticipated to flow towards the northeast. A copy of the Principal Streams and Their Drainage Areas Map of Ohio is included as **Appendix G**.

#### *PHYSIOGRAPHY*

According to the *Physiographic Regions of Ohio* map, published by the ODNR, the Project Area is located near the Allegheny Escarpment, and is situated near the boundary of the Killbuck Glaciated Pittsburgh Plateau of the Glaciated Allegheny Plateaus Province and the Outer Bluegrass Region of the Central Lowland Province. A copy of the Physiographic Regions Map of Ohio is included as **Appendix H**.

#### *GLACIAL GEOLOGY*

According to the *Glacial and Surficial Geology Map of Ohio*, the Project Area is located on ground moraine of Wisconsinan age (14,000 to 24,000 years old). A copy of the Glacial and Surficial Geology Map of Ohio representing the Project Area is included as **Appendix I**.

#### *HYDROGEOLOGY*

According to the *Ground Water Resources Map of Cuyahoga County, Ohio*, published by the ODNR, ground water beneath the Project Area is obtained from impermeable deposits, basically clay overlaying shale or shaley sandstone. Brackish water and dry wells are common and can yield less than 3 gallons of water per minute. A copy of the Ground Water Resources Map representing the Project Area is included as **Appendix J**.

#### *SOILS*

According to the *Soil Survey of Cuyahoga County, Ohio*, published by the United States Department of Agriculture, soil types within the Project Area consist of Brecksville silt loam, 25 to 70 percent slopes (BrF), Mahoning-Urban land complex, undulating (MmB), Ellsworth silt loam, 12 to 18 percent slopes (EID), Hornell-Urban land complex, rolling (HsC), and Mahoning silt loam 0 to 2 percent (MgA) and 2 to 6 percent slopes (MgB). A copy of the Soil Survey representing the Project Area is included as **Appendix K**.

### **1.3 Overall Land Use of the Area**

Land use within the Project Area consists of residentially developed properties and public thoroughfares.

## 2.0 MAPPING

As part of this ESAS, available mapping resources were reviewed for the Project Area and surrounding vicinity to identify commercial, industrial or any other properties or activities that may pose an environmental concern. A summary of the findings of the mapping review is presented in the following subsections.

### 2.1 USGS Topographic Maps

According to the 1994 Cleveland South and 1963 (photorevised 1984) Broadview Heights, Ohio quadrangle USGS topographic maps, “built-up” land with several small structures, presumably residential based on shape and size, is depicted in the southern half of the Project Area; two (2) additional small structures are depicted in the northern half; and an intermittent stream is depicted in the eastern portion. A copy of the USGS topographic map representing the Project Area is included as **Appendix D**.

### 2.2 County and/or City Road Maps

The Project Area is located in Seven Hills, Cuyahoga County, Ohio. Refer to **Figure 1** for a copy of the site map showing the general location of the Project Area. The Project Area includes several residential properties and public thoroughfares situated between Broadview Road and Laura Lee Lane. The public thoroughfares included in this ESAS consist of Twilight Drive, Nemet Drive, Cherry Lane, Hillside Road, Seven Hills Boulevard, Shady Lane, North Mary Lane, Mary Lane, South Mary Lane and Oak Lane.

### 2.3 Aerial Photography

Aerial photographs are available for the Project Area from the Ohio Department of Transportation (ODOT) Aerial Engineering Department for the years 1960, 1963, 1972, 1977, 1982, 1986, 1990 and 1999, from the Cuyahoga County Engineer’s Office for the year 1949 and from Google Earth for the year 2006. Copies of the available aerial photographs are included as **Appendix L**. It should be noted that the eastern portion of the Project Area is not depicted on the 1949 aerial photograph. According to the 1949 aerial photograph, the Project Area primarily consisted of vacant woodlands and farmland with minor development of residential properties and public thoroughfares in the southern portion. Additional development of the Project Area occurred sometime between 1949 and 1960, and continued through 2006, as several public thoroughfares and residential properties are depicted.

### 2.4 Project Mapping and/or Plans

The Client provided a map depicting the public thoroughfares that will undergo construction activities, consisting of the installation of new sanitary sewer lines. A copy of the Client-provided map is included as **Appendix A**.

### 2.5 Oil and Gas Well Mapping

According to the Oil and Gas Well map of Cuyahoga County, Ohio, published by the Ohio Geological Survey ODNR Oil and Gas Interactive Web Map (<http://www.dnr.state.oh.us/website/geosurvey/oilgas/viewer.htm>), no oil and/or gas wells are depicted within the Project Area; however, one (1) plugged oil and gas well (permit #21917) is

depicted within a 0.25-mile distance from the limits of the Project Area. Based on the plugged status of the oil and gas well and the distance of the oil and gas well from the Project Area, it is not believed that the oil and gas well would have impacted the Project Area. A copy of the Cuyahoga County Oil and Gas Well map is included as **Appendix M**.

## **2.6 Fire Insurance Maps**

As part of this investigation, HzW contacted FirstSearch to request available historical Sanborn fire insurance (Sanborn) maps for the Project Area and adjacent areas. According to FirstSearch, no Sanborn map coverage is available for the Project Area. A copy of the “No Coverage” letter provided by FirstSearch is included as **Appendix N**.

### 3.0 REGULATORY DATABASE REVIEW

As part of this ESAS, a search of standard federal and state environmental record sources was conducted by FirstSearch Technology Corporation (FirstSearch) and HzW. A complete list of the standard federal and state environmental record sources reviewed is presented in the following subsections. A copy of the FirstSearch report is included as **Appendix O**.

#### 3.1 Federal Records

The standard federal environmental record sources reviewed as part of this ESAS included the most recent version of the following:

- The Federal National Priorities Listing (NPL) sites list for all sites within an approximate minimum search distance of 0.25-miles.
- The Federal Comprehensive Environmental Response and Liability Information System (CERCLIS) list for all sites within an approximate minimum search distance of 0.25-miles.
- The Federal CERCLIS No Further Remedial Action Planned (NFRAP Archive) sites list for all sites within an approximate minimum search distance of 0.25-miles.
- The Federal Resource Conservation and Recovery Act (RCRA) Corrective Action Sites Lists (CORRACTS) for all sites within an approximate minimum search distance of 0.25-miles.
- The Federal RCRA non-CORRACTS transfer, storage, and disposal (TSD) facilities list for all sites within an approximate minimum search distance of 0.25-miles.
- The Federal RCRA generators list for all sites within an approximate minimum search distance of 0.25-miles.
- The Federal Emergency Response Notification System (ERNS) list for all sites within an approximate minimum search distance of 0.25-miles.

None of the properties within the Project Area or properties within a 0.25-mile search distance of the Project Area were identified on the federal databases reviewed.

#### 3.2 State Records

The standard state environmental record sources reviewed as part of this ESAS included the most recent version of the following:

- OEPA's Master Sites List (MSL)/Division of Emergency and Remedial Response (DERR) database for all sites within an approximate minimum search distance of 0.25-miles.
- OEPA's Solid Waste Facilities (SWF) list for all sites within an approximate minimum search distance of 0.25-miles.
- BUSTR's Leaking Registered Storage Tank Sites (LUST) list for all sites within an approximate minimum search distance of 0.25-miles.
- BUSTR's Registered Underground Storage Tank (RUST) lists for all sites within an approximate minimum search distance of 0.25-miles.
- OEPA DERR's SPILL database for all sites within an approximate minimum search distance of 0.25-miles.

None of the properties within the Project Area were identified on the state databases reviewed; however, three (3) properties located within a 0.25-mile search distance of the Project Area were identified on the UST or LUST databases. A summary of the database records, including relative

position to the Project Area and potential environmental impact to the Project Area is provided below.

### ***RUST***

USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. According to the FirstSearch report, the City of Seven Hills, located at 7325 Summitview Drive, Independence, Ohio (0.25-miles southwest) is listed as having one (1) UST. The FirstSearch report did not provide any additional information pertaining to the UST; however BUSTR's website ([https://www.comapps.ohio.gov/sfm/fire\\_apps/bust/bustr/PublicInquiry.asp](https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp)) indicated that the UST is 500 gallons in size, contains diesel, is constructed of reinforced fiberglass, was installed in 1985 and is currently in use. Based on the distance of the UST relative to the Property Area boundary, it is not believed that the UST would have impacted the Project Area.

### ***BUSTR's LUST List***

The Leaking Underground Storage Tank (LUST) Report is the Ohio Department of Commerce Division of State Fire Marshal's Office database listing of all reported leaking underground storage tanks in the State of Ohio. The database is maintained by the Bureau of Underground Storage Tank Regulations (BUSTR) Department. According to the FirstSearch report, two (2) LUST incidents have been reported within 0.25-miles of the Project Area and are presented below.

1. City of Seven Hills, 7215 Broadview Road, Seven Hills, Ohio, (Release ID #18002012-N00001) (0.08 miles southeast)
2. Conrads Tire Service, 7281 Broadview Road, Seven Hills, Ohio (Release ID #18010146-N00001) (0.20 miles southwest)

According to the FirstSearch report, each of the two (2) facilities presented above has been identified on BUSTR's LUST list with the closure of a regulated UST that resulted with a No Further Action (NFA) status. An NFA status is defined as a confirmed release where initial and/or long-term corrective actions have been conducted and BUSTR has determined that further corrective actions are not necessary for the incident. It is not believed that the closures of regulated USTs at the two (2) properties listed above would have impacted the Project Area due to the distance of the facility relative to the proposed construction activities.

## 4.0 VISUAL INSPECTION

A visual inspection of properties located within the Project Area was performed in order to determine land use features that indicate the potential for impacts by hazardous substances and/or petroleum products. No privately-owned transformers were observed within the construction limits of the Project Area during the visual inspection; however, several utility poles were observed in the Project Area that contained pole-mounted transformers. No evidence of a release (i.e., stressed vegetation, staining) was observed in association with the pole-mounted transformers.

One (1) Environmental Site Assessment Screening Checklist was completed for the entire Project Area since all of the properties comprising the Project Area were determined to be residential and since none of the properties were identified on the FirstSearch report. The ESAS Checklist and photos of the general areas in which proposed construction activities will take place are included as **Appendix P**.

A visual inspection of the properties surrounding the proposed Project Area was also performed in order to identify any suspect conditions on properties adjacent to the Project Area.

### 4.1 Properties within the Project Area

Refer to the **Visual Inspection** section of the ESAS Checklist included in **Appendix P** for documented suspect conditions identified at the properties within the Project Area. In addition, refer to the photographic documentation of current conditions within the Project Area provided in **Appendix P**.

### 4.2 Suspect Adjacent Properties

No suspect commercial/industrial adjacent properties were identified during this investigation.

## **5.0 CONCLUSIONS AND RECOMMENDATIONS**

This section presents the conclusions and recommendations for the properties evaluated as part of this ESAS for the Project Area. Based on the findings of this ESAS, no properties are recommended for inclusion in Phase I ESA activities. Discussions of the findings of the properties within the Project Area are presented below. Refer to the ESAS Checklist in **Appendix P** for specific findings for the properties comprising the Project Area.

### **5.1 Properties within the Project Area**

All of the properties within the Project Area are residentially developed. No suspect conditions were identified on any of these properties during a review of mapping resources, regulatory database information or visual inspection activities; therefore, none of the properties comprising the Project Area are recommended for inclusion in Phase I ESA activities.

### **5.2 Suspect Adjacent Properties**

HZW also evaluated potential suspect properties located adjacent to the proposed Project Area to determine the need for further investigation as part of Phase I ESA activities. Based on a review of mapping resources, regulatory database information and visual inspection activities, no suspect commercial/industrial adjacent properties were identified during a review of mapping resources and regulatory database information.

# 2006 BEDROCK GEOLOGIC MAP OF OHIO

## LEGEND

- Dbb** — Berea Sandstone and Bedford Shale, undivided\* (Upper Devonian) (mapped interval includes Cossewago Sandstone in Ashtabula and Trumbull Counties)—Sandstone, siltstone, and shale. Berea Sandstone, gray to shades of brown, medium grained to silty. Bedford Shale, gray, red, and brown; silty to clayey; locally abundant siltstone and sandstone interbeds. Cossewago Sandstone, brown; pebbly, massive to crossbedded; quartzose.
- Mic** — Logan and Cuyahoga Formations, undivided\* (Upper and Lower Mississippian) (mapped interval includes Maxville Limestone in Hocking, Jackson, Muskingum, Perry, Scioto, and Vinton Counties, Rushville Formation in Perry County, and Shenango sandstone and shale in Trumbull County)—Shale, siltstone, sandstone, conglomerate, and limestone. Unit consists mainly of two formations, in descending order: Logan and Cuyahoga Formations. Maxville Limestone, shades of olive, green, brown, and gray; microcrystalline to coarse grained; locally dolomitic, fossiliferous, and arenaceous; locally contains chert and shale interbeds; occurs as discrete deposits of limited extent, absent north of Dillon Lake, Muskingum County. Rushville Formation, shale with sparse limestone in lower portion; red to bluish gray; clayey; known only in western Perry County. Logan Formation, sandstone and siltstone; shades of gray, yellow, and brown; sandstone, mainly silty to medium grained, locally contains lenses and beds of coarse sand grains to fine-pebble conglomerate; siltstone, clayey to sandy; locally contains shale interbeds and partings; locally fossiliferous; absent northeast of Orrville and Rittman, Wayne County, and east of central Medina County. Cuyahoga Formation, sandstone, siltstone, and shale; mainly shades of gray, olive, brown, and yellow; sandstone, silty to conglomeratic, occurs in thin to massive beds; siltstone and shale, occur in thin to thick beds; shale locally black in northern, and red in southern portions of state; locally fossiliferous; unit lithologies commonly intertongue and intergrade; Buena Vista Member (not mapped) occurs in southern portions of state, locally economic. \*Shenango sandstone and shale, shades of brown, yellow, and gray, to almost white; sandstone, medium to coarse grained; shale, clayey, interbedded with siltstone; occurs only in eastern Trumbull County, pinches out westward.

# PRINCIPAL STREAMS AND DRAINAGE AREAS

## LEGEND

Areas of drainage basins, in square miles, are shown by red figures as follows:

- 1757** Areas enclosed by shaded red lines
- 517** Areas enclosed by unshaded red lines
- 313** Auxiliary land areas within the limits of the State.
- 6715** Drainage areas above points indicated by arrows

- Approximate low-water elevation in feet above sea level.
- Navigation lock and dam.
- Reservoir
- Selected urbanized areas, communities, and county seats chosen to aid in map orientation.

0102 22.caf / updated map 11/19/95/10-55031/SSN0002/01-55031/01023

— PROJECT AREA BOUNDARY

### LEGEND

AREAS IN WHICH LESS THAN 3 GALLONS PER MINUTE MAY BE DEVELOPED

Impermeable deposits, basically clay overlaying shale or shaly sandstone, provide a very poor area for even minimal domestic supplies. Brackish water and dry wells are common. Storage is necessary to supply peak demands.

#### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

#### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

## Environmental FirstSearch Descriptions

**NPL: EPA NATIONAL PRIORITY LIST** - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

**NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset** - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

**CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)**- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

**NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES** - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP - No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W - Withdrawn

**RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES** - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD: EPA** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN: EPA/MA DEP/CT DEP** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN - Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

CONNECTICUT HAZARDOUS WASTE MANIFEST - Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.

MASSACHUSETTES HAZARDOUS WASTE GENERATOR - database of generators that are regulated under the MA DEP.

VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.

SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.

LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS: EPA/NRC** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**Tribal Lands: DOI/BIA** INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation.

BUREAU OF INDIAN AFFAIRS CONTACT - Regional contact information for the Bureau of Indian Affairs offices.

**State/Tribal Sites: OH EPA** DIVISION OF EMERGENCY AND REMEDIAL RESPONSE DATABASE(DERR) - database of basic information regarding name and status in the Voluntary Action Program, for potentially contaminated sites that are maintained by district offices in Ohio.

**State Spills 90: OH EPA** SPILL LOCATIONS - database of spills reported to the Ohio Environmental Protection Agency since 1990.

**State/Tribal SWL: OH EPA** WASTE FACILITIES - The Database of all Compost and Demolition Debris, Industrial and Residual Waste, Municipal Solid Waste Landfills and Municipal and Solid Waste Transfer Facilities are maintained by the Division of Solid and Infectious Waste Management.

**State/Tribal LUST: OH FMO** FACILITIES WITH ACTIVE RELEASES FROM REGULATED TANKS - database of leaking underground storage tanks reported to the Ohio Fire Marshal's office.

**State/Tribal UST/AST: OH FMO** LIST OF ACTIVE REGISTERED FACILITIES - database of all registered underground storage tanks.

**State/Tribal VCP: OH EPA** BROWNFIELD INVENTORY (Subset)- database of sites that have voluntary submitted information to the inventory as part of the Site Assessment and Brownfield Revitalization Program (SABR) and over seen by the Voluntary Action Program .

**State/Tribal Brownfields: OH EPA** BROWNFIELD INVENTORY - database of sites that have voluntary submitted information to the inventory as part of the Site Assessment and Brownfield Revitalization Program (SABR).

**RADON: NTIS** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

**FI Map Coverage: PROPRIETARY** FIRE INSURANCE MAP AVAILABILITY - Database of historical fire insurance map availability.
